LANGUAGES AND TECH : C++ | **Python** | React.js | Nodejs | Salesforce(Learning)

PROJECTS

Human Resource Management System

- The HR management system developed provides a comprehensive solution for managing various aspects of human resource functions within an organization.
- The system offers features such as employee record management, attendance tracking, and leave management.
- It enables companies to focus on strategic HR initiatives rather than spending time on administrative tasks, ultimately leading to improved employee satisfaction, retention, and overall business success.
- **Tech Used :** React.js | Node.js | Mongo DB | Express

E-Commerce Website

- Developed a highly scalable and robust e-commerce website using the MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Implemented an intuitive and user-friendly interface using React.js, ensuring an engaging and seamless shopping experience for customers.
- Integrated popular payment gateways such as Stripe or PayPal to facilitate secure and seamless online transactions.
- Utilized responsive web design principles to ensure the website is accessible and user-friendly across various devices and screen sizes.
